SUMMARY

I am a Software Engineering student passionate about programming, seeking opportunities to apply and expand my knowledge in a dynamic work environment. With a solid foundation in Python, Java, JavaScript, and front-end skills, I am committed to developing comprehensive and efficient solutions. I have experience in leadership and teamwork, gained through social projects and volunteer work, making me articulate and effective in communication, as well as empowering me to tackle diverse challenges with dedication. I am eager to contribute significantly in an internship environment where I can continue learning and growing professionally.

ACADEMIC BACKGROUND AND OTHERS

Bachelor of Software Engineering, FIAP, 2024 - 2027

100 Days of code Python bootcamp, London App Brewery, 2024

EXPERIENCE

Crescer Ciências, 2021

- Fully funded by the school, the Crescer Ciências project aims to try to solve problems in underprivileged communities by resorting to biology or engineering.
- My team and I developed a new sanitation system for areas prone to flooding and landslides.

Fórum FAAP 2023

- "For 3 days, I participated in a simulation of the United Nations Security Council (UNSC), representing the delegation of China, in an entirely English-speaking debate to discuss the democratic crisis in Myanmar."

Monitor voluntário de língua inglesa, 2022-2023

- "Aided in English language classes at Crescer Sempre School, focusing on improving students' conversation and essay writing skills."
